

March 2013

Dear customers and stakeholders

NEW HEAD OFFICE & BUSINESS MODEL

In order to realize superior customer service and communication and being closer to our customers in key flower production area

Greeting.

First of all, taking this opportunity, we would like to express our appreciation for your support and day-to-day business relationship with Japan Agribio who has the aim to be the “Professional vegetative propagated floriculture cutting distribution company in Japan”.

Secondary, we would like to inform you today that we have decided to move our head office from central Tokyo to Hamamatsu city in Shizuoka prefecture for the purpose of a more production location oriented high-quality customer service. Our customer service activities will be concentrated in our new office to support best possible customer service.

We have the strong intention to continuously make the best service to all of our customers in Japan in cooperation with our business partners and the Agribio group companies with sophisticated global network and super quality cutting supply chain management. We believe this step will support this. Please find below information on our new head office.
